Press Release

JBuddy™ SDK 6.3 release adds native Java™ APIs for Microsoft's Office Communications Server

JBuddy SDK 6.3 offers unified APIs for developing messaging & presence solutions for public and enterprise instant messaging networks.

Glastonbury, Connecticut - January 20, 2010 – Privately-held Zion Software, LLC today announced the release of JBuddy™ SDK version 6.3. This update adds several new APIs for Microsoft Office Communications Server (OCS 2007) and Live Communications Server (LCS 2005) including conferencing, file transfer, and address book.

JBuddy SDK continues to be the leading software development framework for building IM solutions connecting to public and enterprise instant messaging networks. JBuddy SDK v6.3 supports AIM, ICQ, Windows Live (MSN), Yahoo Messenger, Lotus Sametime, Microsoft LCS & OCS, XMPP and Zion's own JBuddy Message Server.

The JBuddy SDK is bundled with JBuddy Bot Builder and JBuddy Bot Framework, and is available for FREE download at: <http://www.zionsoftware.com/downloads/>
